

ALIF AL RAZI

AI Engineer • Software Engineer

alifalrazi1@gmail.com | +353 894620802 | Galway, Ireland
github.com/alifalrazi | linkedin.com/in/alifalrazi | alifalrazi.com

CAREER OBJECTIVE

Aspiring AI and software engineer with a strong foundation in computer science, machine learning, and computer vision. Passionate about building innovative, production-grade AI systems that drive real-world impact across tech, SaaS, fintech, and digital transformation industries. Experienced in full-stack SaaS development, cloud infrastructure, and deploying intelligent solutions with LLMs, RAG pipelines, and agentic workflows.

EDUCATION

Masters of Science in Computing — HC Artificial Intelligence 2025 – 2026
[Technological University Dublin](#)

Bachelors of Science in Computer Science and Engineering 2020 – 2024
[North South University](#)
CGPA: 3.51 / 4.00

TECHNICAL SKILLS

Programming Languages: Python, JavaScript, TypeScript, C, C++

AI / ML Frameworks: TensorFlow, PyTorch, Keras, scikit-learn, XGBoost

Generative AI & LLMs: LLMs, LangChain, LangGraph, Hugging Face, fine-tuning, prompt engineering

RAG & Agentic AI: Retrieval-Augmented Generation (RAG), Agentic AI, Multi-Agent Systems, Tool-use, ReAct agents

Vector & Embedding: VectorStore, Chroma, Pinecone, Embeddings

Data Science: Pandas, NumPy, Matplotlib, Seaborn, Tableau, Data Analysis, Statistical Modelling

Web Development: React.js, Next.js, Node.js, Express.js, Redux, Tailwind CSS, REST APIs

Cloud — AWS: Amazon Bedrock, S3, EC2, Lambda, SageMaker, ECS, ECR, IAM, CloudWatch, API Gateway

Cloud — Azure: Azure Container Instances (ACI), Azure Container Registry (ACR), Azure OpenAI, Azure Functions

Containerisation: Docker, Docker Compose, Kubernetes (K8s)

CI/CD & DevOps: GitHub Actions, GitLab CI/CD, Jenkins, MLOps pipelines

Databases: MySQL, MongoDB, PostgreSQL, VectorStore

Other Tools: Git, Postman, VS Code, Adobe Photoshop, Adobe Illustrator

WORK EXPERIENCE

Software Engineer May 2024 – August 2025
[Tweetsy Inc.](#)

- Developed full-stack SaaS products with responsive React/Next.js frontends and scalable Node.js backend services.
- Built and deployed AI-driven tools using LangChain, OpenAI APIs, and RAG pipelines to automate client business operations.
- Designed CI/CD pipelines using GitHub Actions and containerised services with Docker and deployed to AWS (ECS, ECR, S3).
- Ensured high performance and scalability through robust system design and code review practices.

Software Engineer Jan 2023 – Dec 2023
[HireSyncs.com](#)

- Developed an AI-powered job application management system (ATS), reducing time-to-fill and improving recruiter decision-making.
- Accelerated product demo creation by building a Chrome extension and web solution, significantly cutting delivery time.
- Designed, developed, and maintained multiple SaaS products using React.js, Node.js, and MongoDB.

Full-Stack Developer (Freelance)

April 2026 – Present

Alpine Global Consultancy

- Designed and developed a full-stack marketing website for Alpine Global Consultancy, a premium HNW relocation and company formation firm operating across Thailand, Malaysia, UAE, and China.
- Built a modern, responsive landing page featuring animated destination showcases, service breakdowns, client testimonials, and a consultation booking flow.
- Deployed in Vercel in for initial testing. Used Next.js, Tailwind CSS, MogoDB

Full-Stack Developer (Freelance)

Jun 2022 – Nov 2022

Basearch.xyz — Real Estate Platform

- Developed a real estate web platform using React.js and Express.js, facilitating property listings and transactions.
- Built RESTful APIs, integrated MongoDB for data persistence, and deployed the application on AWS S3 and EC2.
- Implemented user authentication, property search filters, and a responsive user interface.

Moderator

February 2024 – March 2024

Ecosapiens.xyz

- Promoted constructive community engagement and upheld platform content standards.
- Assisted users with queries and strategised for community growth while managing unsuitable content.

RESEARCH EXPERIENCE

Ophthalmic Diseases Detection Using CNN: A Comparative Analysis of ResNet and VGG Architectures

Published at IEEE International Conference on Computational Intelligence and Communication Networks | DOI:

[10.1109/CICN63059.2024.10847410](https://doi.org/10.1109/CICN63059.2024.10847410)

- Developed a CNN model for automated detection of ophthalmic diseases using ResNet-50, ResNet-18, VGG-16, and VGG-19 architectures.
- Achieved high classification accuracy through comparative benchmarking and hyperparameter tuning on medical imaging datasets.

PROJECTS

ED AI LMS - Knowledge Graph Based Personalised Learning

- Built an AI-powered Learning Management System that uses knowledge graphs and RAG to detect individual learning gaps and deliver personalised study paths.
- Integrated Stripe for payments and Google Auth for user management.
- Next.js · OpenAI API · RAG · Knowledge Graphs · Cloudinary · Google Auth · Stripe*

EmailYourProfessor.com (SaaS)

- Developed a SaaS platform that generates personalised, AI-written emails for students reaching out to professors, reducing writing time significantly.
- Built full-stack with Express.js backend and MongoDB. Next.js as Frontend.

AI-Powered PDF Reading Tool

- Built an AI-powered document Q&A platform using RAG pipelines and OpenAI API, enabling students to extract and query information from PDFs with context-aware responses.
- Integrated Cloudinary for storage and Google Auth for secure access.
- Next.js · OpenAI API · RAG · LangChain · Cloudinary · Google Auth.*

Smart Surplus - Food Waste Reduction Platform

- Developed a marketplace platform where businesses can list near-expiry products at reduced prices to minimise food waste.
- Integrated AI-powered pricing suggestions, Google Auth, and Stripe for secure payments.
- Next.js · OpenAI API · Google Auth · Stripe*

AI T-Shirt Designer

- Created a real-time AI image generation tool allowing users to design custom t-shirts in seconds using text prompts.
- Integrated OpenAI image generation with a clean, responsive UI.
- Next.js · Tailwind CSS · OpenAI API · AI Image Generation (DALL·E)*

Completed more than 60 projects pushed in Github.
